PROFESSIONAL SUMMARY

Quality Assurance professional with experience in manual and API testing, test execution and defect management across web and mobile applications. Comfortable working with Agile teams to investigate issues, improve test coverage and support reliable releases. Brings additional experience in administration and hotel IT systems, with practical knowledge of Jira, Postman, Azure DevOps, Python, Selenium and Cypress.

CORE SKILLS

Software Testing: Manual, functional, regression, exploratory, usability and UAT testing; test case design and execution

API & Automation: Postman, API testing, Python, Selenium, Cypress, basic test automation

QA & Defect Management: Test planning, defect lifecycle, root cause analysis, acceptance criteria, test evidence, traceability

Ways of Working: Agile, Scrum, sprint planning, SDLC, release testing, cross-functional collaboration

Tools: Jira, Trello, Azure DevOps, JMeter, CRM systems, Microsoft Office, Google Workspace

PROFESSIONAL EXPERIENCE

Processing Operative

PCS Wireless | Bracknell, United Kingdom | July 2025 – Present

- Process and inspect Apple MacBook devices as part of refurbishment and redistribution operations.
- Carry out functional and diagnostic checks to identify hardware or software issues and verify device condition.
- Complete visual inspections and record device information accurately in internal systems to maintain traceability.
- Support the organisation, movement and dispatch of equipment while meeting quality and productivity targets.

Software Quality Assurance Tester

Axians Portugal | Lisbon, Portugal | November 2022 – May 2025

- Designed and executed more than 300 manual test cases for enterprise platforms, helping validate functionality and release readiness.
- Managed defects from identification and logging through prioritisation, retesting and closure, using Jira and Trello.
- Performed functional, regression, exploratory, usability and user acceptance testing across web and mobile applications.
- Worked with Product Owners, developers and DevOps colleagues in Agile/Scrum teams to clarify requirements and resolve issues.
- Improved QA documentation and traceability between requirements, test cases, evidence and defects.

Junior Software Quality Assurance Tester

Capgemini Portugal | Lisbon, Portugal | June 2022 – November 2022

- Executed manual functional and regression tests for web-based systems and documented results clearly.
- Reported and tracked defects using Jira and Azure DevOps, supporting investigation and release stability.
- Created API test scenarios in Postman and developed foundational automation skills with Python, Selenium and Cypress.
- Participated in Agile ceremonies and contributed to QA documentation and continuous improvement.

Administrative Assistant

Randstad | Lisbon, Portugal | Feb 2020 – Jun 2022

- Provided customer support via phone, email, and chat focused on EDP billing and solar energy campaigns.
- Clarified billing questions, charges, and payment options.
- Assisted customers in joining solar energy programs, explaining benefits and eligibility.
- Updated and verified customer data in the system.
- Forwarded technical issues to the appropriate departments and followed up on solutions.
- Logged all customer interactions accurately in CRM tools.
- Ensured clear, empathetic, and solution-oriented communication.

Administrative Assistant / IT Support

Hotel Santa Beatriz | Campo Maior, Portugal | Feb 2018 – Feb 2020

- Provided administrative support, maintained records and helped organise day-to-day hotel operations.
- Assisted colleagues with hotel operating systems and routine IT issues affecting daily work.
- Helped identify and report system problems and supported staff in using the software and tools required for hotel operations.
- Handled documentation and internal information carefully while coordinating with different departments.
